DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on November 9, 2004 has been entered.

Allowable Subject Matter

2. Claim 8 is allowed.

The following is an examiner's statement of reasons for allowance:

- The Examiner agrees with the arguments filed by the Applicant and considers that the references of the Prior Art of record fail to teach, or suggest any obvious combination of the limitations discussed in the previous Office Action mailed on May 20, 2004, and further comprising the limitations, **in combination**, of a noise reduction system for use with a vacuum generating device that includes an air turbine to reduce noise generated by the exhaust air from the air turbine when used with an automatic cutting table comprising **an automatic cutting table, a first turbine exhaust air noise reduction member** having a cylindrical main housing

including a turbine exhaust air inlet conduit and an exhaust air outlet conduit, **a second cylindrical housing** having a diameter larger than the first main cylindrical housing, **the second cylindrical housing having a cylindrical body and a closed end and an open end; the cylindrical main housing outlet exhaust conduit mounted coaxially inside the second cylindrical housing** and in fluid communication with the inside of the second cylindrical housing and the noise reduction foam in the second cylindrical housing; and **the second cylindrical housing open end surrounding the main cylindrical housing outlet exhaust air conduit allowing exhaust air exiting the main cylindrical outlet exhaust conduit to contact the composite noise reduction foam in the second cylindrical housing and to reverse direction and exit the second cylindrical housing open end.**

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

3. The attached hereto PTO Form 892 lists prior art made of record that the Examiner considered it pertinent to applicant's disclosure.
